Subject: tentative cost estimate for 2014 DWTSa HAMP funding
Attachments: 2014 tentative DWTSa HAMP cost estimate.pdf

Bessie,

Please find attached a cost estimate for the IHS' preferred scope for 2014 DWTSa HAMP construction funds. This scope encompasses 9,000 LF of pipeline, the 100,000 gallon proposed Upper Sipaulovi WST, and the proposed Sipaulovi/Mishongnovi disinfection facilities. This work would be of benefit to the community of Upper Sipaulovi/Mishongnovi, with the possibility of providing additional water storage and water pressure, even before full completion of the HAMP. Please let me know if you have any questions or would like to further discuss this proposed scope. If additional DWTSa funds become available, feel free to contact me to discuss other HAMP facilities which may be good candidates for immediate construction.

Thank you,

Adam Hughes, P.E.
